STUXNET

Stuxnet: The Attack

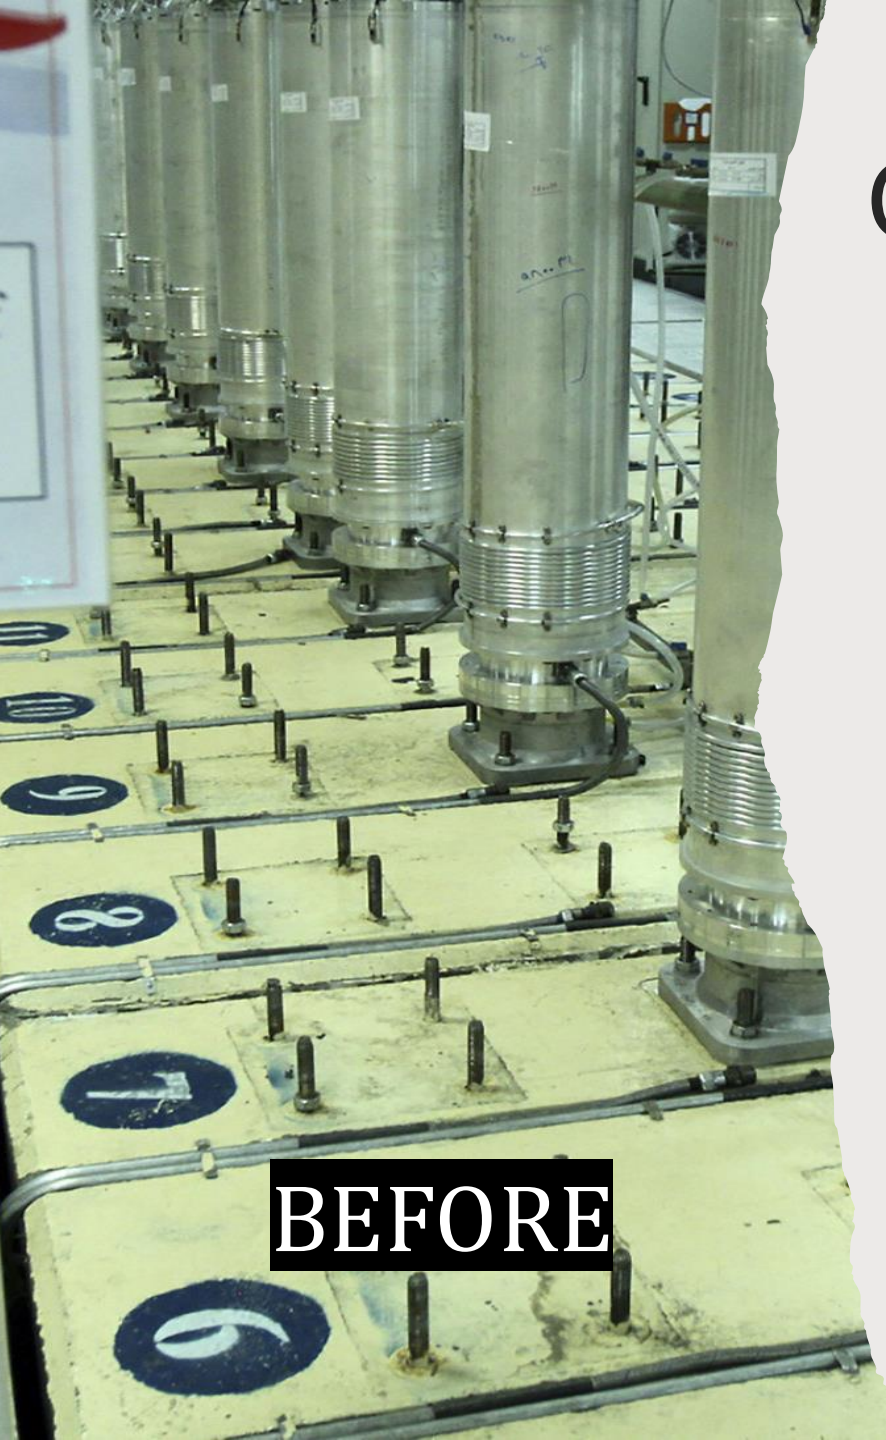

A horizontal timeline with a double-headed arrow above it, consisting of four blue circular nodes connected by a line. The nodes contain text describing the stages of the Stuxnet attack.

The Attack was launched on July the 15th of 2010.

The Stuxnet would be released via USB in 2007.

Stuxnet destroys Centrifuges.

Set Iran's Nuclear plans back years.

Consequences of Stuxnet

- Destroyed 900 of Iran's centrifuges
- Ruined Iran's nuclear enrichment facility
- Delayed Iran's nuclear progression
- Computers using same drivers affected

How Stuxnet was defended

- Deny any USB sticks that are not authorized
- Scan for any portable media that can intercept malware
- Restrict user privileges
